EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech., CSE	National Institute of Technology, Patna	8.44 CGPA	2025
Senior Secondary	Phoenix Institute / Gujarat Secondary and Higher Secondary Board of Education	85%	2024
Secondary	Don Bosco High School / Gujarat Secondary and Higher Secondary Board of Education	86%	2022

EXPERIENCE

- Eve Healthcare** [[Website](#)] Nov 2025 - Feb 2026
Backend Developer Intern Remote - India
 - Engineered and scaled a production-grade **Django-based healthcare platform** serving **100+ registered healthcare users** with real-time clinical workflows.
 - Migrated communication layer from **API polling to WebSockets**, reducing **server load by 50%** and improving message latency.
 - Designed **Service Categories CRM** and optimized Master Services module with structured data formats and efficient query handling.
 - Built **B2B pricing engine** using REST APIs enabling real-time service previews and standardized pricing logic.
- Incubation Center NIT Patna** [[Website](#)] [[Github-Admin](#)] [[Github-Main](#)] Mar 2025 - Present
Web Developer (Backend) Patna - India
 - Architected a layered backend using **Node.js, Express.js, MySQL (Sequelize)** with secure **JWT authentication** and modular REST APIs for Idea, Event, and Notice Management.
 - Engineered **rate-limiting middleware** reducing brute-force login attempts by **~80%** and cutting CPU overhead from bcrypt hashing.

PROJECTS

- JobInfra - Pluggable Background Job Processing Framework** [[GitHub](#)] 2026
Built a production-ready Spring Boot starter enabling low-latency asynchronous job processing without external brokers
 - Engineered a **thread-safe in-memory job queue** with configurable worker pool, dynamic thread management, and failure-safe retry mechanism preventing job loss.
 - Built an **auto-configuration module** for plug-and-play integration in external Spring Boot applications and containerized the demo using **Docker** for consistent environments.
- TradeSathi - A Paper Trading App** [[Website](#)] [[GitHub](#)] [[GitHub-Host](#)] 2025
Stock Simulation Engine
 - Built REST APIs for authentication, portfolio tracking, and order execution with transactional consistency and accurate PnL.

SKILLS

- Languages:** C++, Java, Python, JavaScript
- Backend:** Node.js, Express.js, Flask
- Frontend:** React.js, Next.js, TailwindCSS
- Databases:** MySQL
- DevOps & Tools:** Git, Docker, AWS EC2, Vercel, Railway

CERTIFICATIONS

- PhotonicR PVT. LTD.**, [Certificate of Internship Completion](#) May 2025 - July 2025
- ByteVerse 7.0 Hackathon**, [Certificate of Participation](#) April 2025

ACHIEVEMENTS

- LeetCode Weekly Contest 489 - Global Rank 10303
- CodeChef Starters 210(D) - Global Rank 2763
